Letter from the Founder

Dear Respected Teachers and Principals,

Education is the foundation on which India's future is built. As someone who grew up navigating textbooks, doubt-clearing sessions, and late-night exam preparations, I deeply understand what students go through every single day.

When I founded Perfionix AI, I had one mission: to make powerful AI tools accessible, safe, and genuinely useful — not just for corporations, but for the students and teachers who need them most.

Laplacian AI is our gift to India's classrooms. It is a fully AI-powered digital assistant that helps students understand complex topics, complete their projects, learn to code, analyze data, and get answers — any time, day or night.

To every teacher reading this: you are already doing the most important work in the world. Laplacian AI is here to be your assistant, your students' tutor, and your school's digital partner.

Together, let us give every Indian student the education they deserve.

Executive Summary

Product Name	Laplacian AI
Developed By	Perfionix AI
Founder	Shubham Rahangdale
Target Users	School Students (Class 6–12), Teachers, Academic Staff
Core Purpose	AI-powered digital learning assistant
Access	Web browser (laptop, tablet, phone) · No app download needed
Data Safety	Google-secured login · No data shared with third parties
Language	English (Hindi interface coming soon)

Laplacian AI is an **all-in-one AI workspace** that acts as a personal tutor, research assistant, data analyst, and coding teacher — available 24/7, right from the school computer lab or a student's mobile browser.

It is built in India, for India, with privacy and affordability at its core.

The Challenge in Today's Classrooms

Indian schools are producing some of the world's brightest students. But inside every classroom, there are real, everyday challenges that hold students back:

 Problem	 Real Impact
Doubt not cleared in class	Concepts remain weak, exam fear increases
No access to tutor after school hours	Students from smaller towns fall behind
Project research is just copy-paste	Students copy-paste without understanding
No hands-on coding practice	Students learn theory but cannot code
Data analysis in projects is manual	Students cannot process or visualize data
Teachers spend too much time on content prep	Less time for personal student attention

The result: Students who have access to extra coaching and resources pull ahead. Those who don't, get left behind — not because they are less capable, but because they never had the right tools.

Laplacian AI levels this playing field.

What is Laplacian AI?

Laplacian AI is a **secure, AI-powered digital workspace** that students and teachers can access directly from any web browser. Think of it as having a brilliant, patient, always-available tutor sitting beside every student — one who can explain concepts, answer questions, help with projects, teach coding, and even visualize data — all in one place.

Laplacian AI — Your School's Digital Intelligence Hub

 AI Chat	 DocIQ	 VizIQ	 Code Runner
AI Tutor	Document Reader	Data Analyzer	Code Runner

 AI Chat	 DocIQ	 VizIQ	 Code Runner
Ask any question, get instant answers	Upload notes & PDFs, ask questions	Upload data, get charts & insights	Write & run code in the browser

 **Productivity Suite**

Notes · Tasks · Reminders · Stats

How Laplacian AI Helps Students

1. AI Chat — A 24/7 Personal Tutor

Students can ask **any question, about any subject, at any time** — and get a clear, detailed explanation instantly.

What students can do:

- Ask "Explain Newton's Third Law with a real-life example"
- Say "I don't understand photosynthesis — explain it simply"
- Request "Give me 10 practice questions on the French Revolution"
- Ask for step-by-step solutions to math problems
- Get essay outlines, summaries, and topic explanations

Why it is better than a search engine:

Google / YouTube	Laplacian AI
Shows many links — student must read and filter	Gives a single, clear, tailored answer
No follow-up — student reads alone	Student can ask follow-up questions instantly
Copy-paste temptation	AI explains so student actually understands

Google / YouTube	Laplacian AI
No personalization	Remembers the conversation context

Example: A Class 9 student struggling with quadratic equations can type: *"I don't understand how to use the quadratic formula. Explain it step by step with an example"* — and receive a clear, structured explanation with worked examples, instantly, at 10 PM before an exam.

2. DocIQ — Upload Your Notes, Ask Questions

Students can **upload any PDF, textbook chapter, or notes file** and ask questions about it directly.

How it works for students:

Step	Action
1	Upload your PDF textbook chapter, handout, or notes
2	Ask any question: <i>"What are the main causes of World War 1?"</i>
3	Laplacian AI reads your document and answers with structured points
4	Ask follow-up: <i>"Compare the roles of Britain and Germany"</i>
5	Get a table comparison with key facts

Student benefits:

- No more reading the entire chapter to find one answer
- Instant summaries of long chapters
- Study notes auto-generated from textbook PDFs
- Compare and contrast across multiple documents
- Revision made 5x faster

Teacher benefits:

- Upload question papers, study material, or lesson plans
- Ask the AI to summarize, restructure, or generate quizzes from the content
- Create structured study guides in minutes

Example for Teachers: Upload your 40-page Geography notes PDF. Ask *"Generate 20 short-answer questions from this document for Class 10 students."* Laplacian AI reads your document and gives you a ready question bank in 30 seconds.

3. VizIQ — Turn Data into Dashboards

For students doing **science projects, surveys, economics assignments, or statistics** — VizIQ transforms raw data into professional charts and analysis automatically.

How it helps students:

Step	Action
1	Collect survey data (Google Form results, Excel, CSV)
2	Upload the file to VizIQ
3	Laplacian AI generates: KPI Summary Cards (totals, averages, trends) · Bar Charts · Pie Charts · Line Graphs · Scatter Plot · AI Insights
4	Download charts as PNG images for your project report
5	Export the analyzed data as CSV

Perfect for:

- Science fair projects with experimental data
- Social science surveys and population studies
- Economics assignments on market trends
- Geography data on rainfall, temperature, population
- Annual school event data analysis

Before Laplacian AI: A student spends 3 hours drawing bar charts on Excel, making errors, starting over.

After Laplacian AI: Upload the file → Professional dashboard with 5 chart types in 10 seconds
→ Download and paste into the project report.

4. **Code Runner — Learn Programming by Doing**

Students learning programming in Class 11/12 (Python, C++) or participating in coding competitions can **write, run, and debug code** directly inside Laplacian AI — no setup, no installation needed.

Supported languages:

Python · JavaScript · C · C++ · Java · Rust · Go · Ruby · PHP · TypeScript and more

How students use it:

- Write Python code for Computer Science practicals
- Run programs instantly and see output
- Ask the AI "Why is my code giving an error?" — get explained fixes
- Learn algorithms by asking "Show me bubble sort in Python with comments"
- Prepare for CBSE practicals, competitive programming, and Olympiads

No downloads. No configuration. Works in the school computer lab browser.

5. **Productivity Suite — Stay Organized, Score Better**

Built-in tools to help students manage their academic life:

Tool	How Students Use It
 Tasks	Add all pending assignments with priority levels. Check off as completed. Never miss a submission.
 Notes	Quick notes during class or while studying. Always available, never lost.
 Reminders	Set reminders for exam dates, project deadlines, and teacher meetings.
 Stats	See how many tasks completed vs. pending — visualize your progress.

How Laplacian AI Helps Teachers

Laplacian AI is not just for students. It is a powerful tool that **saves teachers hours every week** and enables them to deliver better lessons.

What Teachers Can Do with Laplacian AI

Use Case	Example Prompts
 Lesson Preparation	"Create a 45-minute lesson plan for Class 8 on Cell Division" · "Give me 5 real-life examples of Newton's Laws" · "Generate an analogy to explain photosynthesis to Class 6"
 Question Paper Creation	Upload the syllabus PDF → "Generate 30 MCQs for Chapter 5" · "Create 5 long answer questions on the Mughal Empire" · "Give me 10 application-based questions on quadratic equations"
 Student Performance Analysis	Upload marks sheet CSV → VizIQ shows class performance · Identify students below average · Visualize subject-wise performance trends

Use Case	Example Prompts
 Report & Document Drafting	"Draft a parent communication letter about exam schedule" · "Summarize this 20-page curriculum document for me" · "Write feedback comments for student progress reports"
 Instant Research	Real-time web search integrated — AI cites sources · "What are the latest changes in CBSE Class 10 syllabus?" · "Find current statistics on climate change for my lesson"

Time Saved for Teachers Per Week

Task	Without Laplacian AI	With Laplacian AI	Time Saved
Lesson planning (1 topic)	2–3 hours	20 minutes	~2 hours
Question paper (30 Qs)	3–4 hours	15 minutes	~3.5 hours
Student data analysis	2 hours	5 minutes	~2 hours
Drafting parent letters	45 minutes	5 minutes	~40 minutes
Chapter summarization	1 hour	5 minutes	~55 minutes
Total per week	~10 hours	~50 minutes	~9 hours saved

9 hours saved every week = More time for actual teaching, student attention, and personal rest.

Subject-Wise Use Cases

Science (Physics, Chemistry, Biology)

Student Query	What Laplacian AI Does
"Explain the difference between mitosis and meiosis with a diagram"	Clear explanation with bullet points · Auto-generated diagram · Comparison table
"I got 72% in my bio test but don't know what to revise"	Asks about weak topics → Generates a targeted revision plan

Mathematics

Student Query	What Laplacian AI Does
"Solve this: If $2x + 3y = 12$ and $x - y = 1$, find x and y "	Step-by-step solution with explanation at each step · Checks if student understood
"Explain integration for beginners"	Simple analogy · Worked examples · Practice questions · Interactive follow-up

Social Science & History

Student Query	What Laplacian AI Does
"Summarize the causes of the First World War in 5 bullet points"	Clean, exam-ready bullet point summary
"Create a timeline of Indian Independence Movement"	Auto-generates a visual timeline diagram · Key dates, events, and leaders structured for revision

Computer Science

Student Query	What Laplacian AI Does
"Write a Python program to find the factorial of a number"	Clean, commented Python code · Runs instantly and shows output · Gives a follow-up challenge to extend learning

Student Query	What Laplacian AI Does
"Explain what a stack data structure is"	Simple real-life analogy · Python code example · Visual diagram

Commerce & Economics

Action	Output
Student uploads survey data CSV to VizIQ	Bar chart: Consumer preference by age group
	Pie chart: Market share distribution
	Trend line: Monthly spending patterns
	AI Insight: <i>"18–25 age group drives 48% of spending"</i>
	All charts downloadable for the economics project report

English & Languages

Student Query	What Laplacian AI Does
"Check my essay on climate change and suggest improvements"	Identifies weak arguments and unclear sentences · Suggests better vocabulary and structure · Rewrites weak paragraphs as examples
"Explain the theme of loss in the poem 'The Road Not Taken'"	Deep literary analysis with textual evidence · Connects to the poet's life context

Key Features for Schools

Feature Overview

Feature	Student Benefit
 AI Chat	24/7 doubt clearing, any subject
 Multi-session Chat	Separate chats for each subject/topic
 Web Search	Latest information with cited sources
 Image Upload	Take photo of textbook problem, get help
 DocIQ	Ask questions about uploaded PDFs/notes
 Document Summary	Summarize entire chapters in seconds
 VizIQ Dashboard	Professional data charts for projects
 Chart Download	Save charts as images for reports
 Filter & Slicers	Explore data interactively like Power BI
 Export CSV	Download analyzed data for reports
 Code Execution	Run Python, C++, Java in the browser
 Mermaid Diagrams	Auto-generate flowcharts and timelines
 Notes	Organized digital notes per subject
 Tasks	Assignment tracking with priorities
 Reminders	Exam and deadline alerts
 PWA Support	Install on phone like an app

Works on Every Device

Device	Access Method	Requirements
School Computer (Lab)	Chrome / Firefox browser	Internet connection
Student Laptop	Any modern browser	Internet connection
Android Phone	Chrome browser or Install as PWA	Internet connection
iPhone / iPad	Safari browser or Add to Home Screen	Internet connection

No app download required. Open the browser, go to the Laplacian AI link, log in with Google — done.

Student Safety & Privacy

We understand that schools and parents have serious concerns about student safety online. Laplacian AI is designed with privacy and safety at every level.

#	Commitment	What It Means
	Login via Google	No new username or password — students log in with their school Google account
	No Data Sharing	Student conversations are never shared or sold to any third party
	Session Isolated	Each student's data is completely separate from every other student
	No Ads	Laplacian AI shows zero advertisements — ever
	No Social Features	No chat between students, no public feed, no social pressure
	Encrypted	All data is transmitted securely over HTTPS

#	Commitment	What It Means
IN	India-First	Built and operated by an Indian company, aligned with DPDP Act 2023

Responsible AI Use — What We Teach Students

Laplacian AI is not about copying answers. It is about **learning with AI assistance**.

The platform is designed to:

- **Explain** concepts so students understand, not just copy
- **Ask follow-up questions** that deepen understanding
- **Guide** step-by-step rather than hand over final answers
- **Encourage** students to attempt first, then verify

"Give a student a fish, and they eat for a day. Teach a student to ask the right questions, and they learn for a lifetime."

— Perfionix AI's guiding principle for education

Getting Started

For Schools — 3 Simple Steps

Step	Action	Details
1	Contact Perfionix AI for a School Demo	 connect@perfionixai.com ·  www.perfionixai.com · We will schedule a free 30-minute live demonstration for your teachers and students.

Step	Action	Details
2	Pilot Program in Your School	We onboard one class or one department first. Students get access via their Google school account. Teachers get a guided walkthrough and support.
3	School-Wide Rollout	Based on pilot feedback, expand to all classes. Dedicated support from our team. Regular updates and new features — at no extra cost.

For Individual Students — Start in 60 Seconds

Step	Action
1	Open any web browser
2	Go to the Laplacian AI link provided by your school
3	Click "Sign in with Google"
4	Use your school Google account
5	Start asking questions — your AI tutor is ready

For Teachers — First Day Checklist

- ☐ Log in with your Google account
- ☐ Open **AI Chat** — ask it to create a lesson plan for your next class
- ☐ Upload one PDF chapter to **DocIQ** — ask it to generate 10 questions
- ☐ Open **VizIQ** — upload any CSV and explore the auto-generated dashboard
- ☐ Add your next exam date as a **Reminder**
- ☐ Share the access link with your students

Frequently Asked Questions

Q: Does the student need to install anything?

No. Laplacian AI works entirely in the web browser. Open the link, log in with Google, and start using it.

Q: Is it safe for students below 18?

Yes. There are no social features, no ads, no content generated outside the student's own queries. All conversations are private and session-isolated.

Q: Will students use it to cheat on assignments?

Laplacian AI is designed to explain and guide, not to produce ready-made assignments. Teachers can set AI-aware assignments that ask for process, reflection, and personal examples — which AI cannot provide for the student.

Q: Does it work in Hindi or regional languages?

Currently in English. Hindi and regional language support is in active development.

Q: What if our school does not have fast internet?

The platform is lightweight and works on standard school broadband connections. It does not require video streaming or heavy downloads.

Q: Is there a cost for schools?

Please contact us at connect@perfionixai.com for school pricing, partnership programs, and free pilot arrangements.

Q: Can teachers control what students access?

Yes. School administrators can configure access levels. We also provide teacher dashboards in our upcoming enterprise version.

About Perfionix AI

 Founder & CEO	Shubham Rahangdale
 Headquarters	Nagpur Maharastra India
 Website	www.perfionixai.com
 Email	connect@perfionixai.com
 Product	Laplacian AI — Enterprise AI Workspace

Our Mission: To democratize AI tools for every Indian — from the boardroom to the classroom — building technology that is safe, powerful, and proudly Made in India.

Perfionix AI was founded with the belief that artificial intelligence should not be a privilege of the elite — it should be a right of every student, every professional, and every organization in India.

Our flagship product, **Laplacian AI**, is used across enterprises, startups, and now schools — bringing the power of GPT-level AI to Indian users in a safe, private, and locally-operated platform.

We are committed to:

- Building AI that respects Indian data privacy laws
- Pricing our tools affordably for Indian schools and institutions
- Supporting educators with free training, demos, and onboarding
- Continuously improving based on real teacher and student feedback

Contact Us

We would love to bring Laplacian AI to your school. Reach out to us for a **free demonstration, pilot program, or any questions**.
